Specifications

- 200A maximum current, 120A 100% (230V)
- 140A maximum current, 100A 100% (110V)
- Auto line, 110V to 230V +/- 15% (mono - 50/60hz)
- 7.5 inches color touch screen Interface
- Auto calculation for program setting through diameter, thickness, configuration and material
- Programs from 1 to 20 levels
- Step modes advance speed-wire pulse
- Dual Gas control: purge gas (through purge time, as well as electrode gas, through pre-gas, or ppm levels)
- Compatible with oxygen measuring systems
- USB software updates (evolution of versions)
- USB program storage: 200 programs per stick
- Possibility of remote through iPAD, iPHONE or Android
- Detachable cooling unit
- Printing: programs and real parameters
- Data acquisition
- Multi-language: 14 languages programmed
- Compatible with other manufacturer's welding heads
- Wi-Fi Version available (remote control)
- Manual torch available as an option
- Weight: 46 lb (21 kg) without cooling.

QUALITY
Dual Gas monitoring at the power source.
Purge gas control through time or ppm level
